

## In the box

1. Two wooden sticks ready to install
2. Three dowels (in case you lose one)

## Warranty

We are confident in the highest quality of our goods, however, should anything happen we offer 5 years warranty on this product.

Twonee disclaims all liability for damage or injury resulting from the improper installation or use of items. Weight limit for hanging bike is 16 kg (35lbs). Do not ever hang themselves on the sticks.

## Tools needed

- Screw Gun / Drill
- Auger 14 mm diameter
- Level
- Pencil/marker

## Installation

**Step 1** - Find two support points on your bike to hang it on sticks. Measure the distance between them and reflect points to the wall. Use level if sticks should be placed at the same height.

**Step 2** - Next, drill your marked holes and put anchors inside.

**Step 3** - By hands screw the hangers into the anchors until it stops.

**Step 4** - Hang your bike and enjoy.

## Important

These hangers are suitable for strong and stable walls like wood or masonry walls. They are not suitable for weak and thin walls like plasterboard.
