5. Big screws and dowels

Warranty

We are confident in the highest quality of our goods, however, should anything happen we offer 5 years warranty on this product.

Twonee disclaims all liability for damage or injury resulting from the improper installation or use of items. Weight limit for hanging bike is 20 kg (44lbs). Do not ever Do not ever hang themselves on the bike rack.

Tools needed

- Screw Gun / Drill
- Auger 8 mm diameter
- Screwdriver
- Level
- Pencil/marker

Installation

Step 1 - Lock hook in the base using small screws

Step 2 - Hold the rack up to the wall at the desired place (using a level or iPhone) and mark points in holes.

Step 3 - Next, drill your marked holes and put anchors inside.

Step 4 - Using a screwdriver secure hook to the wall.

Step 5 - Attach the bike to find rear wheel place position and instal it.

Step 4 - Hang your bike and enjoy.

Important

You can mount this bike rack on drywall also if you know how it to do. You'll need special anchors for mounting (found at a local hardware store). But we are not responsible for the result because the wall materials can be different and mounting requires special care.
