

In the box

1

1. Shelf
2. Screws and dowels (3 sets)
3. Cork lining

Warranty

We are confident in the highest quality of our goods, however, should anything happen we offer 5 years warranty on this product.

Twonee disclaims all liability for damage or injury resulting from the improper installation or use of items. Weight limit for hanging bike is 20 kg (44lbs). Do not ever sit on, stand on, or hang from the bike shelf.

Tools needed

- Screw Gun / Drill
- Auger 12 mm diameter
- Wrench
- Level
- Pencil/marker

Installation

Step 1 - Hold the shelf up to the wall at the desired place (using a level or iPhone) and mark points in holes.

Step 2 - Next, drill your marked holes and put anchors inside.

Step 3 - Stick cork bandages on shelf cutouts to protect the bike frame.

Step 4 - Using a wrench and the screws provided, secure the shelf to the wall.

Step 5 - Hang your bike and enjoy.

Important

You can mount the shelf on drywall also if you know how it to do. You'll need special anchors for mounting (found at a local hardware store). But we are not responsible for the result because the wall materials can be different and mounting requires special care.
